

Check Valves

Solving problems including reverse flow and pressure surges, FES Subsea provide a wide range of Check Valves to suit any and all client requirements.

Using proven design methodologies and precision manufacturing, FES Subsea retain control over product quality and material traceability – allowing for Check Valves designed to meet bespoke client specifications.

- Sizes available to meet requirements – from 1/8" to 12"+
- Bespoke design to meet required cracking pressures
- Manufactured with a range of connections – Flanged, Weld Prep, Male or Female Fitting (NPT, BSP, Autoclave etc.)
- Working pressures from 0 to 15,000PSI+
 - Materials: Stainless Steel 316L, Duplex F51, Super Duplex F51, Inconel 625/718 etc.
 - Wafer, In Line, Cartridge and Swing type check valves available.
 - FES In-House testing facilities allow for rigorous hydrostatic testing and check testing.
